

## SPRING SHADE HOUSES

- Australian manufactured to suit Australian conditions – proven performance over the last 40 years.
- Strong and sturdy construction.
- Made from heavy duty galvanized 25.4 diameter x 1.6mm tube frames galvanized internally and externally.
  - Galvanised Tube has a long life – Not ultra violet light affected like plastics.
  - Galvanised Tube is impervious to white ant attack.
- Precision made patented joints which simply socket together.
- DIY kits, easy to assemble with 3D instructions – no bolts or clamps
- No sharp edges or protrusions to damage valuable shade covers
- No bolts or ugly clamps
- Standard lockable hinged door located centrally on end wall
- 450mm long extension legs allowed for concreting into uneven ground
- Frame is spaced off ground for extended life
- 2.1 metre high door openings
- Doors swing in or out for easy access
- Inbuilt hanging rails

**Shade House Kits available in Gable Roof, flat roof and Lean-to**

### Cover Material:

- UV Stabilised horticulture shade cloth fabric
- Top quality knitted shade cloth covers with individual removable panels.
- 75% Green Shade Cloth
- Extra strong knitted shade cloth
- Covers simply tie to frame using plastic cable ties providing a smooth clean finish.

### Options:

- Large range of Spring Benching Kits available for shade house benching using the same materials and construction methods.
- Hanging rails for hanging pots

### ALTERNATIVE TO A LARGE SHADE HOUSE

#### 2 and 3 Tier “Spring Benching” with Shade Cloth Cover
